

The Postdoc Research Day Poster Session, organized by the JPL Science Division and the University Research Affairs Office, has been rescheduled to Tuesday, September 29. You are invited to stop by von Karman Auditorium between 10:00 am and 3:00 pm to view posters summarizing the exciting research being conducted by JPL and IPAC postdocs in

- Astrophysics and Space Science
- Earth Science
- Planetary Science and Life Detection
- Technology, Instrumentation, Engineering and Other.

The top poster in each category will be selected by a panel of judges and announced at the end of the session. Winners will each receive an engraved plaque and briefly summarize their research at an awards ceremony planned for October 5.

The poster session will open at 10:00 am with introductory remarks by Hal Yorke, Science Division Manager, Dan McCleese, JPL Chief Scientist, and Charles Elachi, JPL Director. Dan will close the session by announcing the winners, starting at 2:45 pm.

This is a great chance to become familiar with the cutting-edge science and technology work--the basis for future missions--being conducted by our postdocs and their advisors.

We hope you will be able to attend!

(Carl Ruoff for) Jack Stocky,
Acting ESD Deputy Director for Research
